

SolarGrid Energy Solutions

Pge energy storage projects

Overview

Polish utility PGE (WSE:PGE) plans to build over 80 energy storage facilities with a total capacity exceeding 10,000 MWh by 2035 in order to meet the challenge of the growing electricity production from renewable sources. How many energy storage facilities will PGE Group add in 2035?

Polish utility PGE Group is planning to add more than 80 energy storage facilities through to 2035 to the tune of PLN 18 billion (\$4.7 billion). One of these will be the 981 MWh Zarnowiec battery energy storage project, which will be supplied with locally produced LG Energy Solution's grid-scale systems.

What is PGE's Energy Storage plan?

PGE Group has laid down ambitious plans for energy storage deployment over the next ten years. In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035.

Does PG&E have a battery energy storage system?

Including these nine new projects, PG&E now has contracts for battery energy storage systems totaling more than 3,330 MW of capacity being deployed throughout California through 2024. To date, more than 600 MW (of the 3,330 MW contracted) of new battery storage capacity has been connected to California's electric grid including:

What is PGE Group's energy storage portfolio?

Today, PGE Group's energy storage fleet stands at nearly 7 GWh. It is comprised almost exclusively from pumped hydro storage facilities aside from three single-digit-megawatt battery energy storage systems. The planned investments will help diversify the utility's storage portfolio.

How much is PGE Group worth?

Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion). Today, PGE Group's energy storage fleet stands at nearly 7 GWh. It is comprised almost exclusively from pumped hydro storage facilities aside from three single-digit-megawatt battery energy storage systems.

Why is PGE accelerating its investment in battery storage?

PGE Group board president Dariusz Marzec said the company is accelerating its investments in battery storage due to the increase in the share of renewable energy on the grid. The Żarnowiec BESS will provide grid services to the TSO and help balance the output of wind farms both onshore and offshore in the nearby Baltic Sea that PGE wants to build.
