

SolarGrid Energy Solutions

Phnom Penh Outdoor Power Supply BESS

Overview

How many mw / 4100 MWh of Bess capacity will be deployed?

The project will aim at deploying at least 2100 MW / 4100 MWh of BESS capacity with grid-forming inverter in various locations across Cambodia mostly for ancillary services, peak load shifting and grid congestion relief.

Does Cambodia have a power supply?

None currently available. Cambodia has substantially increased power generation capacity while reducing imports from neighboring countries. Domestic power generation has rapidly increased from 8.68 TWh in 2020 to 17.85 TWh in 2024, while imports decreased from 3.06 TWh in 2020 to 1.57 TWh in 2024.

How important is solar power in Cambodia?

By 2030, solar PV and wind power are expected to account for 38% of the total generation capacity in Cambodia. In particular, solar PV is considered critical as it supplements seasonal variability of hydropower outputs between dry and rainy seasons throughout the year in Cambodia.
