## Overview

---

Is Port Moresby a suitable location for solar energy?

This alternative approach is considered because Port Moresby city is situated in a location that is exposed to a significant amount of solar radiation of about 1976 kWh/m<sup>2</sup> GHI annually. Therefore, this makes Port Moresby a suitable location to utilize this type of renewable energy technology.

What is Port Moresby?

Port Moresby is PNG Power's network that is best able to cope with the intermittency of grid-connected solar PV and therefore provides the best environment for testing and understanding the impacts of grid integration of solar PV systems. diesel engines.

Can solar PV reduce the cost of power supply in Papua New Guinea?

Application and implementation procedures. Solar PV has the potential to reduce the cost of power supply in Papua New Guinea and reduce carbon emissions. By issuing this Notice, PNG Power intends to start allowing solar PV systems to connect to its grids through a customer's regular electricity connection, but only under certain.

Does Papua New Guinea power offer rooftop solar PV systems?

2.1.1 Within its service area, Papua New Guinea Power Limited ('PNG Power') will allow and facilitate the connection and operation of Rooftop Solar PV Systems to its distribution networks, subject to the terms of this Notice.

Can PNG Power introduce a solar PV system?

PNG Power may introduce larger solar PV systems, which are dedicated to exporting energy to the grid, under separate arrangements. For example, as competitively-procured Independent Power Producers (IPPs) in accordance with PNG Power's power development plan. 2.2.1 A connection diagram for Rooftop Solar PV Systems is provided below.

Does PNG Power still provide electricity services?

That PNG Power still recovers its reasonably efficient costs of providing electricity services, as per its Licence and Electricity Regulatory Contract with the Independent Consumer and Competitions Commission (ICCC). Application and implementation procedures.
