Portable power source factory in Latvia

Overview

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Will a new battery factory be built in Latvia?

The Swedish company Anodox Energy Systems wants to build two factories in Latvia to produce batteries for electric vehicles. According to Latvia's Ministry of Economy, a plant for the assembly of battery packs will be built first in the port of Riga. The second plant, which will focus on cell production, is to follow shortly afterwards.

Are new wind farms a good investment for Latvia's energy security?

I am pleased that the bar has been set high for developers of new wind farms, which also plays an important role in the context of Latvia's energy security," said Climate and Energy Minister of Latvia, Kaspars Melnis. Given the total investment in the project, the OP Corporate Bank provided loan financing.

Who makes the best cars in Latvia?

Latvia-based companies such as Bucher Municipal, LEAX Rēzekne, LAS-1 company, LEAX Baltix, Dinex Latvia, EMJ Metāls, SFM Latvia, Metaro, Defense Partnership Latvia and LANOS all currently have products in many of the world's best cars. Janis Vitenbergs, Latvia's Minister of the Economy:.

Why did anodox choose Latvia?

Anodox chose Latvia "based on its location, automotive ecosystem, and government incentives". Yet the country is only meant to be the starting point for setting up production facilities across Europe. The company is reportedly also considering Germany, Greece and Luxembourg as possible investment locations.
