

SolarGrid Energy Solutions

Portugal solar power generation and energy storage manufacturers

Overview

Is solar power a growing source of energy in Portugal?

Solar power is a growing source in the Portuguese energy mix. Solar power contributes 6.72 TWh of generation to the Portuguese grid, accounting for 14.5% of total electric power generation as of 2024 with 5.81 GW of installed capacity. Portugal has set a goal of between 8.1 GW and 9.9 GW in installed capacity by 2030.

What is the largest solar power plant in Portugal?

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcútem. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the needs of 200,000 homes. It occupies an area of 320 hectares and will prevent the emission of 326,000 tons of carbon dioxide every year.

How many solar panels are installed in Portugal?

The entire work cost more than 250 million with more than 376,000 solar panels, the power plant has a capacity of 62 MWp. On fixed structures, approximately 190,000 panels are installed, while 52 thousand Euro worth panels are installed on single-axis trackers. In Portugal, Galp begins construction on its first large-scale solar PV installation.

How much solar power will Portugal produce in 2023?

Solar installed capacity reached 1.03 GW by the end of 2020, accounting for 3.6 percent of the total production of power. Portugal established a target of 6.4 gigawatts of installed capacity by 2023, with a goal of 9 gigawatts by 2030. A plant in Coruche will generate seventy megawatt-hours each year.

When did solar power start in Portugal?

In January 2020, Portugal built a system for the fitting of small-scale rooftop solar installations, which immediately went into effect. Serpa, an eleven-

megawatt solar power plant in Portugal, began construction in June 2006 and was finished in January 2007.

Who makes the Serpa solar power plant?

Sanyo, SunPower, and Sharp manufacture 52,000 photovoltaic modules for the Serpa solar power plant. The plant follows the Sun's daily passage through the sky with new tracking technology. This plant is located on a 60-hectare (150-acre) hillside, is a prototype of clean energy production combined with agriculture.
