

**SolarGrid Energy Solutions**

# **Power storage systems factory in South-Africa**

## Overview

---

Who is supplying battery energy storage systems in South Africa?

Source: Eskom. A Chinese green technology company has been contracted to supply battery energy storage systems (BESS) for the Oasis 1 cluster of projects in South Africa. Envision Energy announced the contract with the EDF Group, to supply three battery energy storage systems (BESS) amounting to 257MW of capacity and 1,028MWh of storage.

How does battery storage work in South Africa?

Battery storage systems offer a solution by storing surplus energy generated during peak production periods and releasing it when demand is high, ensuring a consistent and reliable power supply. The South African government has acknowledged the potential of battery storage and has set ambitious targets for its deployment.

Can South Africa become a global player in battery storage?

The energy transition presents a unique opportunity for South Africa to not only address its internal challenges, but also become a global player in the battery storage industry.

Is Envision Energy the largest energy storage system supplier in South Africa?

Envision Energy announced the contract with the EDF Group, to supply three battery energy storage systems (BESS) amounting to 257MW of capacity and 1,028MWh of storage. The company claims this marks the largest BESS order in South Africa and positions it as the first energy storage system supplier in the region to secure a GWh-scale order.

How can South Africa tackle battery storage challenges?

To overcome these challenges and unlock the potential within the battery storage sector, South Africa needs a multi-pronged approach that must include: investment in refining and processing infrastructure; focusing on

existing strengths; fostering collaboration; developing attractive investment incentives; and embracing innovation.

Does South Africa manufacture batteries?

Technically speaking, South Africa has no facilities that can manufacture batteries from start to finish. That is because there is no plant producing the cells that form the basic building blocks of batteries.
