Overview

How often are energy prices published in Europe?

Every 2 years, a report on energy prices and costs in Europe is published, taking stock of the recent trends for gas, electricity and oil prices, as well as other energy costs.

What is the future of energy storage in Europe?

The European energy storage market contracted in 2019 to 1 GWh, with a cumulative installed base of 3.4 GWh across all segments. However, the future of energy storage in 2020 in Europe remains positive as the energy transition progresses.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from €250 to €400 per kWh, with a clear downward trajectory expected in the coming years.

What is the 6th Report on energy prices & costs?

The 6th report on energy prices and costs was published in February 2025. It assesses the impact of the recent energy crisis and its aftermath. Based on the 2025 report, the Commission has developed 5 visualisation tools.

What is the Commission report on energy prices & costs?

The Commission report on energy prices and costs takes stock of the latest trends for gas, electricity and oil prices, as well as other energy costs in Europe and internationally.

How did Russia's Pipeline gas supply compare to the previous quarter?

Pipeline gas supply from Russia dropped by close to half (-45%) compared to the previous quarter as Russian gas transit through Ukraine stopped on 1 January 2025. The year-on-year decrease in Russian pipeline gas imports was 39%. Total Russian gas imports declined by 28% year-on-year and 27% quarter-on quarter.
