Overview

What are supercapacitors & EDLC?

Supercapacitors, also known as ultracapacitors and electric double layer capacitors (EDLC), are capacitors with capacitance values greater than any other capacitor type available today. Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance than traditional capacitors.

Where can I buy 500 F supercapacitors / ultracapacitor?

Supercapacitors / Ultracapacitors 500f 2.7V +50% / -20% tol. Supercapacitors / Ultracapacitors 500f 2.7V +50% / -20% tol. 500 F Supercapacitors / Ultracapacitors are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for 500 F Supercapacitors / Ultracapacitors.

What does L1 & L2 mean in a supercapacitor?

L1= Load life rating of the super capacitor (typically 1000 hours at rated temperature). L2= expected life at operating condition. Tm= Maximum temperature rating of the supercapacitor. Ta= Ambient temperature the supercapacitor is going to be exposed to in the application. Vr = rated voltage of capacitor. Warning.

Can a supercapacitor be used as a primary power source?

Supercapacitor solutions are sized to provide the appropriate amount of ride through time until the primary backup power source becomes available. For applications requiring power for only short periods of time or is acceptable to allow short charging time before use, supercapacitors can be used as the primary power source.

Are supercapacitors suitable for pulse power applications?

Supercapacitors are ideally suited for pulse power applications, due to the fact the energy storage is not a chemical reaction, the charge/discharge behavior

of the supercapacitor is efficient. Supercapacitors are utilized as temporary energy sources in many applications where immediate power availability may be interrupted.

What are supercapacitors based on?

Supercapacitors are based on a carbon technology. The carbon technology used in these capacitors creates a very large surface area with an extremely small separation distance.
