

SolarGrid Energy Solutions

San Diego Solar Power Generation System

Overview

Does San Diego need solar?

San Diego as a region needs a lot of renewable energy to meet lofty climate goals it has set for itself. To provide all that energy, San Diego is currently looking east, where there's budding opposition to large-scale solar projects.

How much does solar energy cost in San Diego?

The cost of generating energy there is relatively cheap, from \$31 to about \$42 per megawatt hour, according to the county's study. And there's existing infrastructure built by San Diego Gas and Electric to get it to San Diego. Imperial Valley farmer Trevor Tagg drives past a large solar farm near land he owns on March 22, 2022.

Is San Diego facing a big solar project?

To provide all that energy, San Diego is currently looking east, where there's budding opposition to large-scale solar projects. Trevor Tagg, Imperial Valley farmer, stands between his farm field and a massive solar installation on March 22, 2022. He calls his farm "the island" because it's surrounded by solar panels on all sides.

Could rooftop solar meet San Diego's energy demands?

Specifically, the researchers analyzed whether rooftop solar, along with small solar parks on urban, potentially polluted land called Brownfields, could meet San Diego's energy demands. It could, Leslie said, but it might not be economically feasible.

Could San Diego reach its energy demand by 2050?

Still, procuring renewables from Imperial Valley is one of the few ways San Diego could reach its projected energy demand by 2050, the researchers say. The cost of generating energy there is relatively cheap, from \$31 to about \$42 per megawatt hour, according to the county's study.

Could a German solar company redevelop a farm field in San Diego?

Immediately east of town, the Irvine-based branch of a German solar company wants to redevelop a nearby farm field into about 90 megawatts of solar for San Diego Community Power customers.
