

**SolarGrid Energy Solutions**

# **Senegal household energy storage power production**

## Overview

---

How much electricity does Senegal produce?

In 2013, Senegal had a population of 14.13 million (Table 1). In 2015, total electricity produced was 343 ktoe, with 88.9 per cent from fossil fuels and 9 per cent from solar and wind. Final electricity consumed was 276 ktoe, as shown in Table 2 (AFREC, 2015). Figures 2 and 3 highlight the key energy statistics.

What energy sources do Senegalese Pos use?

Among the energy sources used by POs, 34% comes from the SENELEC network, 34% use small heavy fuel oil gen sets, 22% have an independent solar installation and 11% use Biomass. The cost of electricity represents an important part of the production costs of Senegalese POs as illustrated in this graph.

What is the energy system of Senegal?

In the 2000s, a national energy information system (known as) was put in place in the Ministry of Oil and Energies. A lot of data for a better understanding of the energy system of Senegal. In reaching 3.72 Mtoe in 2013. The demand is covered by imported fossil fuels and traditional biomass. The energy consumption has 2.56 Mtoe in 2013.

Why is electricity important in Senegal?

In the context of Senegal, access to electricity is recognised as a must to reduce poverty and increase social cohesion. Therefore, the energy sector of Senegal has attracted in recent years many donors and development partners. The total financing from the Development Partners in the sector (2012 - 2018) is estimated at USD 1,284,481,6002.

What are the productive uses of energy in Senegal?

The productive uses of energy cover practically all areas of economic activities

in Senegal; including agriculture, mining, industry, crafts, transport, commerce and services.

How can solar energy be used in Senegal?

In this context, several studies have been carried out in Senegal to promote the productive uses of energy. PERACOD recommends that solar refrigeration to preserve agricultural and fishery products, solar pumping for agriculture as well as the solar mill are priority areas for the creation of income in Senegal.

## Senegal household energy storage power production

### Scoping study Renewable Energy Senegal

Apr 7, 2022 · Concepts and applications such as solar powered cold storage, water pumping, irrigation, drying and local processing are highly needed to unlock the potential of the sector ...
