Serbia Communications 2025 Rural 5G Base Station

Overview

Is Telekom Srbija planning a 5G launch in Serbia?

Telekom Srbija is planning ahead for next year's expected 5G launch in Serbia, which it aims to harness to spur digitisation there and in other countries. The company's CEO, Vladimir Lučić, talks of the future opportunities opened up by these developments and Telekom Srbija's current expansion in the region.

How will 5G help Serbia?

This included setting up more than 1,200 4G base stations in Serbia alone, while we have also ramped up fibre-optic access. When we later enhance our network with 5G, it will help us to increase the efficiency of our operations, optimise costs and improve customer experience in the coming years.

When is a 5G spectrum auction coming to Serbia?

A 5G spectrum auction is expected in Serbia in 2023, for which we are preparing. We then hope to implement our network based on the technology there by the end of next year. While we plan to put a big focus on that rollout, we are also aiming to introduce 5G in Montenegro and Bosnia-Herzegovina.

Will Serbian 5G auctions be transparent and technology-neutral?

The Chinese tech player holds a temporary licence to use the 3400 MHz (transmitting frequency) and 3600 MHz (receiving frequency) bands. Officials questioned this speculation, saying that Serbian 5G auctions will be transparent and technology-neutral, so that all operators have the right to purchase equipment from any manufacturer.

Which countries are launching mobile telephony services in 2023?

We launched mobile telephony services in Switzerland and North Macedonia in October, and are planning additional service launches in Germany, the US and Canada in 2023. The expansion in North Macedonia further grows our service footprint in the Western Balkans, a region where we are already at the

forefront of the industry.

What will Telekom Srbija invest in in 2023?

Through that fund, Telekom Srbija will continue to invest in multiple business areas in 2023, including AI, big data, fintech, e-commerce, IoT, adtech, software-as-a-service and blockchain technology.

Serbia Communications 2025 Rural 5G Base Station

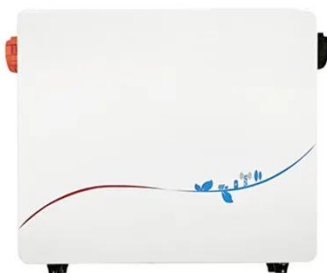

China 5G rush - 4.5m 5G base stations, 300 5G-A ...

Jun 27, 2025 · Mobile operators in China are ramping up 5G and 5G-A rollouts, with the former now at 4.5 million cell sites and the latter in 300 cities.

How 5G Base Stations Are Powering the Future of Connectivity
