Serbia Super Smart Capacitor Factory

Overview

How will Eviden Meet Serbia's needs for computing power?

To meet Serbia's needs for computing power, Eviden will deploy its BullSequana XH3000 supercomputer, designed and manufactured in its French flagship factory.

Is Serbia a leader in AI research in Europe?

Emmanuel Le Roux, Head of Advanced Computing, Eviden, Atos Group said “ With its investment and current leading responsibility in the Global Partnership on AI, Serbia has been at the forefront of AI research and application in Europe.

Could Serbia be a technological leader in LFP battery production?

The Republic of Serbia could be a technological leader in LFP battery production in the whole world outside of China, because it has a chance to become the first in Europe to mass-produce this type of battery. The signed Memorandum with the European Union envisages a serious focus on the ecosystem of electric vehicles and battery production.

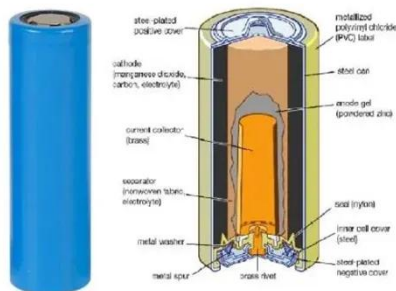

What is the economic potential of a supply chain in Serbia?

The economic and market potential of this type of business model and supply chain in Serbia is enormous. We could expect about 10-12 billion euros of new income for Serbia and about 20 thousand new jobs in our country, as well as a consequent serious growth and development of employees in the industry.

Can Serbia become the energy power of the world?

Serbia has a chance to become the energy power of the world in a few years. If we were to form an entire production chain in Serbia, it would certainly open up space for numerous investments in our country. The economic and market potential of this type of business model and supply chain in Serbia is enormous.
