Silver ornaments of Benin solar air conditioner turn yellow

Overview

Why do air conditioners turn yellow?

Yellowing is a very common occurrence in ageing air-conditioners. But what causes them to turn yellow?

The main reason would be oxidation, be it from exposure to UV rays, heat, or even sulfurization from air pollutants. These would make fundamental changes within the molecular structure of the plastic which eventually results in yellowing.

Can a yellow air conditioner be reversed?

Once the plastic has turned yellow, it is not possible to reverse the process. Therefore, if you wish to avoid the yellowing process, do keep your air-conditioners away from UV exposure, especially if sunlight enters through a window during the day. How do I remove yellow stains from my air-conditioner?

.

Will regular aircon service return my yellow aircon back to white?

Regular aircon servicing can maintain your aircon's function, but regular cleaning will not be able to return your yellow aircon back to white. In this article, we will guide you to remove, and get rid of yellow stains from your air-conditioner.

How do I prevent my air conditioner from yellowing?

To prevent yellowing and ensure optimal air conditioner performance, follow these tips: Protect from sun exposure: Install a shade or cover over the outdoor unit to reduce UV radiation damage. Clean regularly: Regularly clean the air conditioner's surface, coils, and fins using a soft brush and mild detergent.
