

Small container stations from Kuwait City to Rong Energy

Overview

Where is al-Zour LNG terminal located?

Al-Zour LNG terminal is located in the Al-Zour region, approximately 90km south of Kuwait's capital, Kuwait City, near the border with Saudi Arabia. The conceptual and feasibility studies to select the suitable technology and location for the Al-Zour LNG import terminal were conducted by Foster Wheeler, along with a local partner, in 2014.

When will Kuwait's LNG terminal start receiving LNG deliveries?

The terminal will start receiving LNG deliveries from 2022 under a 15-year agreement between Qatar Petroleum and Kuwait Petroleum Corporation (KPC). Pursuant to the agreement, Qatar will supply up to three million tonnes per annum (Mtpa) of LNG to Kuwait. The project completed power energising in August 2019.

What is Kuwait's Oil and gas infrastructure?

Revised July 2023, this map illustrates Kuwait's oil and gas infrastructure. The locations of onshore and offshore oil and gas fields and pipelines are marked alongside associated infrastructure including oil refineries, gas processing plants, tanker terminals and LNG facilities.

How much will al-Zour LNG import terminal project cost?

The project includes the construction of a re-gasification facility, storage tanks and marine facilities. It is estimated that the Al-Zour LNG import terminal project will attract an investment of \$3bn. Construction on the project started in 2016 and is scheduled for completion by 2020.

What is the liquefaction capacity of al-Zour LNG terminal?

The liquefaction capacity of the terminal was estimated at 30 billion cubic meters per day (bcm/d). The Al-Zour LNG Import Terminal was completed in November 2021 and reached full operations in February 2022.

How will the LNG project impact Kuwait?

LNG supplies from the facility will feed power plants across Kuwait, enabling them to generate enough power to meet electricity demands during peak times. Opportunities will also be created by the project for local private and public companies to accelerate industry growth throughout the region.

Home Energy Storage (Stackable system)

High Efficiency Easy installation Safe and Reliable Perfect Compatibility

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid compatibility problem
- LiFePO₄ battery, safest and long cycle life
- Stackable design, effortless installation
- Capable of High-Powered
- Emergency-Backup and Off-Grid
