How do I choose a small and powerful generator?

One thing to consider when looking for a small and powerful generator is whether you want a traditional generator which burns some kind of fuel such as gas or propane, or a portable power station/ solar generator which has zero emissions due to being powered by a Lithium ion battery and so is safe to operate indoors.

What is included in a gensrock portable power station?

GENSROCK Portable Power Station, 88Wh Solar Generator (Solar Panel Not Included), Lithium Battery Power Bank with 110V/150W Peak AC Outlet, LED Flashlight for CPAP Home Camping Travel Emergency.

Should you buy a generator or a portable power station?

Generally a gas powered generator will give you the most bang for your buck in terms of power output vs the cost of the device. Fuel consumption and efficiency varies between models. A portable power station obviously has the advantage of being completely clean though with no emissions and no messy fuel situations.

What is a small Solar power generator?

A small solar power generator is a relatively cheap, sustainable way to generate off-the-grid power when you need it. For example, if you have a cabin that you can't connect to a power grid and you don't want to rely on a traditional gasoline-powered generator, you might consider installing a small photovoltaic solar power system.
