

SolarGrid Energy Solutions

Smart energy storage battery manufacturer in Rotterdam the Netherlands

Overview

Read about us | S4 Energy employs specialist expertise and equipment together with sophisticated software to fully unlock the power of energy storage. Storage techniques (chemical, electrolytic, kinetic) incorporate proven technology including our own unique, patented KINEXT storage units. Based in the heart of Rotterdam, Netherlands, S4 Energy's operations extend across Europe. Who will build the battery energy storage system in the Netherlands?

Equans Netherlands will take charge of the engineering and construction of the battery storage system. Eneco will optimize the battery to maintain grid balance without increasing local congestion. Dispatch, a Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS).

Are battery energy storage systems a direct source of flexibility?

An important direct source of flexibility for the electricity market, are battery energy storage systems (BESS). DNV has been commissioned by Invest-NL to examine the Dutch wholesale and balancing market developments and opportunities for BESS.

Is this the first 4four-hour battery energy storage system in the world?

From ESS News Rotterdam-based S4 Energy has commissioned a 10 MW/40 MWh battery energy storage system (BESS) in Rilland, Netherlands, marking what the company claims is the first 4four-hour duration system of its kind in the country.

When will Eneco & EP NL's battery storage project be operational?

Eneco and EP NL have announced a joint investment in a 50 MW / 200 MWh battery storage project at the Enecogen power plant in the port of Rotterdam. The two energy companies, which each hold a 50% stake in Enecogen, expect the battery to be operational in 2027.

Is this Eneco's first battery in the Netherlands?

At the same time, it's a shame that this is only Eneco's first own battery in the Netherlands," said Karen de Lathouder, COO Assets at Eneco. "We are still miles away from achieving the battery capacity required in the Netherlands to prevent power shortages and grid congestion, as well as reducing emissions from our energy system sufficiently.

What is a battery energy storage system (BESS)?

The rise of power generation from weather-dependent renewables, combined with a major shift in demand towards increased electrification, leads to new challenges in continuously balancing demand and supply of electricity. An important direct source of flexibility for the electricity market, are battery energy storage systems (BESS).
