Solar Lighting Installation

Overview

Components All the components of a solar light come included in one box. This, however, doesn't mean that all the tools you'll need to prop.

How to install solar lights?

You need to install the solar light in the correct location, make sure the angle is correct, and get enough sunlight. You need to clean the solar lights on the solar panel regularly as dust and other garbage can collect on them. This prevents sunlight from reaching the solar panels, thus preventing the solar lights from working.

Where can solar lights be installed?

These solar lights can be installed anywhere and everywhere around your house, garage, driveway and garden. Because they're solar-powered you don't need to have a power point nearby to plug the light into and they don't have to be wired into your meter box.

What is DIY solar lighting?

DIY solar lighting is designed to be user-friendly, making the installation process relatively simple. With basic tools and a step-by-step approach, you can install solar lights in your outdoor spaces without the need for professional assistance.
