

SolarGrid Energy Solutions

Solar Monitoring 2000W

Overview

What is micro inverter 2000W?

Reasonable price micro inverter 2000W is a grid connected solar inverter with 433MHz wireless communication and IP65 waterproof streamline design, convert 24 V / 48 V (22-60 V DC) to 80-160 V / 185-265 V AC, the AC output can be chosen 120 V or 230 V according to the local grid voltage, built-in high-performance MPPT function for higher efficiency.

What is a Micro solar inverter?

Economical price grid tie inverter with 110V pure sine wave AC output, micro solar inverter 2000W MPPT with IP65 Waterproof, more stable and efficient. The working temperature of this solar power micro inverter between -20 °C to 50 °C. Smart micro inverter often used in farming generation system, power station and household use.

What is 433mhz communication code in Solar Grid tie micro inverter 2000 watt?

433MHz communication code in solar grid tie micro inverter 2000 watt offers advantages like longer range, lower power consumption, and reduced interference. It ensures reliable communication between micro inverter and monitoring system, enhancing efficiency and performance in distributed energy system.

How efficient is a solar inverter?

The advanced MPPT technology achieves efficiency levels above 99%, with a peak conversion rate of 80%. Given that solar panels typically have an efficiency of around 80%, if an inverter needs to deliver 500 W, you would require a solar panel with a capacity of approximately 780 W.

How much power does a solar inverter need?

Given that solar panels typically have an efficiency of around 80%, if an

inverter needs to deliver 500 W, you would require a solar panel with a capacity of approximately 780 W. This is determined by the calculation: $780 \text{ W} \times 0.8 \times 0.8 \approx 500 \text{ W}$. This feature allows a small solar grid-tie inverter to become a high-power inverter.

What is MPPT solar inverter & how does it work?

The advanced MPPT technology achieves efficiency levels above 99%, with a peak conversion rate of 80%. Given that solar panels typically have an efficiency of around 80% This feature allows a small solar grid-tie inverter to become a high-power inverter. To meet higher energy consumption needs, this product can be stacked.
