

SolarGrid Energy Solutions

Solar Onsite Energy Outdoor Installation Sites

Overview

How can on-site solar PV & energy storage improve sustainability?

To achieve sustainability goals while meeting the increasing electricity demands of electrification, organizations are pairing on-site solar PV generation with on-site energy storage. These systems, which are considered as “behind-the-meter” (BTM) systems, allow facilities to maximize the benefits of on-site renewable generation.

Do on-site solar systems work everywhere?

However, many on-site systems simply can't scale large enough to cover full consumption needs, so they typically only cover a percentage of the facility's needs, relying on traditional electricity to cover the deficit. They also don't work everywhere as solar and wind resource varies from location to location, as well as incentives and rebates.

Should you install solar onsite via a PPA?

Installing solar onsite via a PPA requires zero upfront capital expenditure and—due to the low price of solar in China—onsite installations offer significant opportunity for energy cost savings and progress on environmental performance.

Can on-site storage be used alongside solar PV?

If a utility restricts the exports from a facility to the grid, the use of on-site storage alongside solar PV can provide a solution to avoid costly infrastructure upgrades, thus increasing the feasibility of larger on-site PV installations.

Do off-site solar and wind projects work everywhere?

They also don't work everywhere as solar and wind resource varies from location to location, as well as incentives and rebates. Large energy consumers are increasingly looking to procure their renewable energy from off-site projects.

Are on-site and off-site energy systems a good investment?

Many benefits exist for both on- and off-site systems. On-site systems offer a better return on investment because financial savings are across the entire electricity supply chain – costs associated with energy generation, transmission and distribution, market volatility, and environmental costs.

Solar Onsite Energy Outdoor Installation Sites

OnSite Energy, Inc.

6 days ago · OnSite Energy, Inc. Solar Electric Power Generation Bozeman, Montana 449 followers Premier solar electric and battery storage system ...
