Solar System Warranty Period

Overview

Solar panels generally come with two warranties: The product warranty covers the equipment and typically guarantees at least 10-12 years without fail, and the power or performance warranty often guarantees at least 90% production at 10 years and 80% at 25 years. How long does a solar panel warranty last?

Solar panel manufacturers guarantee their products are free from material and workmanship flaws. Their warranty typically lasts for 10 to 25 years, offering extended coverage. Common Terms: Manufacturer warranties often cover defects in materials and workmanship, ensuring that the solar panels and inverters meet specific quality standards.

What warranties does a solar system have?

Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1. Product warranties A solar product warranty covers the physical components of your system, such as the panels, inverters, or batteries.

Are solar panels covered by a warranty?

A solar panel warranty doesn't cover the performance of your other system components like your inverter, mounting materials, or battery. These products are covered by their own separate warranties and are also vital for your system's long-term value and performance. What's the power warranty on solar panels?

.

What is a solar product warranty?

Critically, solar product warranties cover manufacturing defects rather than any issues that arise during or after your installation. For a product warranty to remain valid, a certified solar professional may need to handle, install, and maintain your solar panels, inverters, or batteries. 2. Performance warranties.

Does cleaning solar panels void warranty?

In general, cleaning solar panels doesn't void their warranty under manufacturer guidelines. Solar panels should never be cleaned with abrasive tools or chemicals, and a soft brush and soapy water are recommended. For rooftop and other hard-to-reach solar panels, professional assistance can also ensure both your safety and that of your warranty.

How long do solar panels last?

A solar panel's power warranty ensures that it will generate a certain percentage of its original output through its expected lifespan. Also known as the performance warranty, today's top-tier solar panels are sold with power warranties of at least 80% electricity-generating capacity after 25 or 30 years. How long does a solar system last?
