

**SolarGrid Energy Solutions**

# **Solar air conditioning price standard**

## Overview

---

The cost of a solar air conditioner can vary greatly depending on the model and manufacturer, but generally, it could range from \$2,000 to up to \$10,000 or more. What are the different types of solar air conditioners?

Before you look at specific products, it helps to understand the different types of solar technology on the market. The three main types of solar-powered air conditioners are direct current (DC) solar air conditioners, alternating current (AC) solar air conditioners, and hybrid solar air conditioners.

How much does a solar-powered HVAC system cost?

Compared to regular air conditioning systems, solar-powered HVAC systems are a lot more costly – about \$2,000 before installation fees. Adding in the installation fee, the price rises to about \$5,000.

What are the best solar-powered air conditioners?

Whether you want to go entirely off-grid or invest in a smaller solar air unit, SolAir World has some of the best solar-powered AC solutions available. The company offers hybrid solar air conditioners as well as 100% off-grid systems.

How much does air conditioning cost a year?

According to the EIA, in 2015, about 60% of U.S. households relied on central air conditioning, while 23% used an AC unit; about 5% of households relied on both central HVAC and a supplementary AC unit. Conventional air conditioner systems cost over \$29 billion annually, according to the U.S. Department of Energy.

Does Solair world sell solar air conditioners?

In addition to solar air conditioners, SolAir World also sells solar panels, solar refrigerators, ceiling fans and batteries. GREE makes a variety of conventional air conditioning solutions, including a Solar Hybrid Hi Wall Inverter Air Conditioner.

## What is a hybrid solar air conditioner?

Hybrid solar air conditioners: Hybrid solar air conditioners use a combination of electricity from the grid and solar power to reduce the overall cooling costs of your space or whole home. More specifically, an AC/DC hybrid system uses grid electricity to run the unit's fans, but solar energy to run the compressor.
