

**SolarGrid Energy Solutions**

# **Solar lighting system installation in New York USA**

## Overview

---

What are the best Solar Lease companies in New York?

Plus, SunPower guarantees the energy output from the system you lease, which is an additional protection that other companies don't always provide. Sunrun is another big name you'll likely come across when researching solar leases in New York.

How do I choose a solar company in New York?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. For installation companies in New York, no statewide licensing is required.

Who is Brooklyn solar works?

Brooklyn SolarWorks is a solar design and installation firm based in Gowanus, Brooklyn, serving New York City. We've completed nearly 2,000 residential, multifamily, and commercial solar projects within the five boroughs. After spending years trying to find a solar installer in the 5 boroughs, I finally was referred to Brooklyn Solar Works.

Should you get a solar loan in New York?

Solar loans are popular among homeowners because you don't have to have the money for the installation upfront, but you get better lifetime savings than with a leased system. You also get to directly use the incentives (tax credits, rebates, etc.) available in New York, rather than a leasing company retaining them.

Do I need a solar battery in New York?

No, you don't technically need to install a solar battery in New York. Solar panels can operate and lower your electricity bill even without a battery.

However, you may want to invest in a battery to keep your home running in the case of a power outage.

How much does a 6 kW solar system cost in New York?

A 6 kW solar system will cost about \$17,160 in New York before incentives. After the 30% federal solar tax credit, this drops to \$12,012, or about \$2 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed and how you finance it.
