

**SolarGrid Energy Solutions**

# **Solar photovoltaic modules in Latvia**

## Overview

---

What is the biggest solar project in Latvia?

The project was successfully implemented in cooperation with the largest Latvian private energy group AJ Power and has a total capacity of 489 kW generated by 1580 FuturaSun photovoltaic panels. Currently, it is the biggest solar panel installation in Latvia, and it will generate almost 500,000 kWh of green energy annually.

Does Latvia have solar energy?

So far, however, the development of solar energy in the country has been rather limited. According to Latvia's grid-operator Sadales tīkls AS, which is a subsidiary of Latvenergo, there was just 1.3 MW of renewable energy power installed under net metering at the end of 2016.

Where are SIA lyngson solar panels made?

The company's production site is in Olaine Municipality, Latvia. The company actively seeks energy-efficient solutions to enable it to cut its CO<sub>2</sub> emissions and adopt sustainable manufacturing principles. So far, it is the first implemented phase of the SIA Lyngson solar panel project.

What is Sia lyngson solar project?

So far, it is the first implemented phase of the SIA Lyngson solar panel project. The company's investment in the PV project's first phase reached EUR 295,210. Thanks to the installed solar panel system, the company will cut its yearly CO<sub>2</sub> emissions by 141,000 kg and save more than EUR 44,500 annually on energy costs.
