

Solar power satellite factory in Philippines

Overview

Will the Philippines build the largest solar project in the world?

Due to its numerous islands, the country may prioritize mini-grids and independent clean power systems. The announcement of the constructing of what will be “the largest solar project in the world” has now come from the Philippine Islands.

Where will GBP's solar plant be located?

The solar plant will be located in a 135ha site in the Philippine Communications Satellite Corporation's (PHILCOMSAT) grounds in Rizal. Slated to commence operations in 2022, the project marks GBP's entry into the renewable energy market.

How many solar panels will be installed in the Philippines?

According to Solar Philippines New Energy Corporation (SPNEC), the energy company behind the project, it should be finished in two years and will have 5 million solar panels. The solar park, called Terra Solar, will have 3,400 to 3,500 MW of solar panels and 4,000 MWh of battery storage.

Where is pH renewables' first solar power plant located?

Groundbreaking ceremony of PH Renewables' first solar power plant in Baras, Rizal . Credit: Global Business Power Corporation. Sign up for our daily news round-up!.

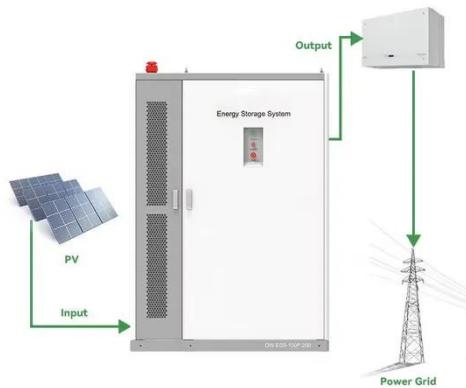

Is the Philippines a go-to place for solar projects in Southeast Asia?

Analyst pointed out that legal changes and a more open energy market have made the Philippines a go-to place for developing large-scale solar project in Southeast Asia. A 2022 report by the International Renewable Energy Agency (IRENA) indicated that the Philippines aims to install 15 GW of green energy by 2030.

Where are solar panels made?

Our factory is located in Batangas of the Philippines. We own four production lines, two lines of the solar cells and two lines of the solar panels with an annual capacity up to 1GW. We aim to provide our clients with full industrial chain products and service, to meet various needs from them around the world.
