Overview

Is Auckland a good place to invest in solar energy?

Enjoy clean, renewable energy on your terms with \$0 upfront. A robust 2,066 annual sunshine hours combined with increasing energy costs position Auckland as a prime location for solar energy investment. The region's climate and growing solar adoption demonstrate strong potential for households seeking energy independence and cost reduction.

How many solar homes are there in Auckland?

Solar uptake in Auckland continues to accelerate, with installations doubling since 2020. The region now features 12,707 solar-powered homes, with a total installed capacity of 60.9 MW. New installations averaging 7.6 kW in size demonstrate the growing shift toward residential solar energy.

Which banks offer green energy finance in New Zealand?

All major banks in New Zealand offer green energy finance options, enabling their customers to install solar systems, air conditioning, ev charging systems and home batteries for little to no interest cost. How much is your monthly energy bill?

Anything else we should know?

Auckland wide solar installer and energy storage system experts.

How much do solar panels cost in NZ?

Solar panels cost very little in NZ and offer a reliable source of power for water pumps, lighting, security cameras and alarms, remote communications, security gates, signage billboards, light houses, and on-site container offices. Wherever you need power, we can design off-grid solar systems perfect for your needs.

Do you provide solar installations in New Zealand?

Yes! We provide solar installations in Auckland, Northland, Waikato, The Bay of Plenty and throughout the rest of New Zealand. With local installers and partners supporting both urban and rural properties.

Which energy storage solution is best for residential PV+ESS application?

KSTAR BluE series energy storage solution is the optimal choice for residential PV+ESS application. The AC capacity is 3 phase 10KW. The energy storage capacity can be configured as 10.2KWH. Max. Continuous PV Input Power: 20kW Max. DC Voltage: 1100V Max. Input Current Per MPPT: 15A Max. Short-circuit Current Per MPPT: 20A Max.
