

**SolarGrid Energy Solutions**

# **Solar power storage options in Victoria**

## Overview

---

Why do Australians need solar battery storage?

As more Australians embrace solar energy, battery storage solutions have become essential for maximising its benefits. With the right solar battery storage system options, homeowners can store excess energy, reduce reliance on the grid, and enhance energy independence.

Why should you invest in a solar battery storage system?

Solar battery storage systems enable homeowners to store surplus energy generated during the day for use at night or during power outages. With Australia's abundant sunlight and rising electricity prices, investing in a quality battery storage system is smart for those seeking to save on energy costs and contribute to a sustainable future.

Should Victorians add a battery to their solar PV system?

With the rising cost of electricity, many Victorian households are adding a battery to supplement their solar PV system. Consider whether a battery system is right for you now, or down the track. Section 2: What incentives are available to Victorians for solar battery systems?

Could 330MW solar-plus-storage system be fast-tracked in Australia?

Image: Edify Energy. Renewable energy developer Elgin Energy has seen a 330MW solar-plus-storage site featuring a 250MW/500MWh battery energy storage system (BESS) fast-tracked by the Victoria government in Australia.

Can you get a solar battery loan in Victoria?

Solar Victoria is supporting eligible Victorian households to install a solar battery, by providing a interest free loan up to a maximum of \$8800. However, there are some basic criteria that might need consideration for the

eligibility of the same.

What is solar battery storage & how does it work?

Battery storage enables any unused or excess power generated by your solar energy system to be stored for usage when electricity prices are at the highest. Moreover, your home can also make use of solar in the evening through the energy stored even after the sun goes down!

## Solar power storage options in Victoria

---

### Solar Batteries Melbourne

Install a battery energy storage solution with a capacity of at least 6kWh, listed on Solar Victoria's approved battery product list. Not have an existing energy storage system in place.
