

**SolarGrid Energy Solutions**

# **Solar power system installed in Moldova**

## Overview

---

Today about 400MW of renewable energy capacity has been installed in the Republic of Moldova – of which about 230MW of solar PV, and 170MW of wind capacity. Will Moldova reach net-zero by 2050?

However, to attain net-zero by 2050, the renewable energy capacity in the Republic of Moldova will have to increase 4 times from the 2024 levels. Today about 400MW of renewable energy capacity has been installed in the Republic of Moldova – of which about 230MW of solar PV, and 170MW of wind capacity.

What is the main source of energy in the Republic of Moldova?

In the reference scenario, natural gas, primarily imported from the Russian Federation, remains the main component of the Republic of Moldova's generation mix accounting for over 30% and followed by oil.

Why is Moldova a low energy country?

The Republic of Moldova's low energy self-sufficiency, covering only about 21% of its energy needs domestically, makes it heavily reliant on imports, particularly from the Russian Federation for natural gas and Romania for oil products.

Will the Republic of Moldova rely on fossil fuels?

In this case, the Republic of Moldova will remain dependent on the import of fossil fuels, despite its vast renewable energy potential. In such case the vulnerabilities of the energy system of the Republic of Moldova are expected to continue over the long run.

Why is Moldova's electricity supply so vulnerable?

Since November 2023, the MGRES gas-fired power plant in Transnistria is making up for the electricity import deficit from Ukraine. This heavy reliance on external sources, particularly from politically sensitive regions, makes the Republic of Moldova's electricity supply extremely vulnerable.

## How important is Moldova's cross-border power system?

Geographically positioned between Romania and Ukraine, the cross-border power system of the Republic of Moldova is critical for regional energy security and regional integration with the European and Moldova-Ukraine energy markets.

## Solar power system installed in Moldova

---

### **Moldova seeks investment for wind, solar plants ...**

Aug 16, 2024 · Moldova launched its first tender for wind and solar power plants on Friday as part of a push to reduce its reliance on Russian energy.

---

### **Solar Panels Installed on Moldova's Presidential Palace to ...**

Jul 5, 2024 · A solar panel system has been installed on the Presidential Palace of Moldova, marking a significant step in the country's commitment to renewable energy. The project was ...

### **4.1MW solar system installed in Moldova**

4.1mw solar system was successfully connected to the Internet to generate electricity. The system uses Risen 600w solar panels, which have high power generation efficiency and the ...
