

SolarGrid Energy Solutions

Solar power with grid backup in Durban

Overview

Our residential solar system installations include grid-tied solar systems, also known as grid-connected or grid-interactive solar systems, are solar power systems that are connected to the electrical grid.

What is a battery backup for a residential solar system?

Battery backups for a residential solar system are devices that store electricity generated by the solar panels for use when the sun is not shining or when the grid is down. They are designed to work in conjunction with residential solar panel systems and allow homeowners to have access to electricity even during power outages or load shedding.

Why should you choose a hybrid solar system in Durban?

Supply of solar solutions in Durban, solar panels, inverters, batteries – complete solutions suited to humid conditions. Aluminum panel mounting Hybrid Solar solutions are ideal for Durban residential and small business, offering a good balance between cost vs savings and providing backup for regular power outages.

Where can I install a solar system in Durban & KwaZulu Natal?
