

## SolarGrid Energy Solutions

# South America Factory Energy Storage Project

## Overview

---

Sunny Power signed a 650MW PV project in Brazil in 2022, and also signed a 500MW distribution agreement with Brazil's SOL+Distribuidora last year. On January 12, BYD and Spain's Grenergy reached a procurement agreement for a 1.1GWh energy storage system for the world's largest energy storage project, the 4.1GWh energy storage project in Chile's Atacama Oasis, supplying it with 2,136 Magic Cubes. What is the largest battery storage project in South America?

One of the largest battery storage projects in South America is being built in the Chilean Atacama desert. It complements the existing 220 MW PV power plant Diego de Almagro Sur operated by the electric utility company Colbún S.A. Since 2022, the plant has been supplying the region with solar power using SMA technology.

How is solar energy stored in Latin America?

“Solar power is stored in a grid-supportive manner and is used 24/7 to stabilize the grid. This underscores SMA's commitment to the expansion of a sustainable and secure energy supply in Latin America.” The large-scale storage system is being built in the commune of Diego de Almagro in the Atacama region.

Where is a large-scale solar storage system being built?

The large-scale storage system is being built in the commune of Diego de Almagro in the Atacama region. In synergy with the neighboring PV power plant, it enforces the energy infrastructure in one of the most important solar regions in Chile.

What makes SMA a good solar power plant?

In synergy with the neighboring PV power plant, it enforces the energy infrastructure in one of the most important solar regions in Chile. SMA is supplying 67 medium-voltage power systems, each equipped with a Sunny Central Storage 4400 UP-S featuring cutting-edge SiC-MOSFET technology—for

the highest efficiency and energy yield.

How will a solar battery storage system benefit Chile?

The battery storage system will not only store solar power but can be activated as needed and will also contribute to Chile's security of supply through instantaneous reserve and black-start capability.

Which solar power plant is in Diego de Almagro sur?

It complements the existing 220 MW PV power plant Diego de Almagro Sur operated by the electric utility company Colbún S.A. Since 2022, the plant has been supplying the region with solar power using SMA technology. This is now followed by a 228 MW battery storage system with a capacity of 918 MWh and a four-hour charging and discharging time.
