Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular structure simplifies installation, maintenance, and scalability.

How many LiFePO<sub>4</sub> cells are in a 48V 100Ah battery pack?

1. Battery Pack Structure Design Cell Selection: A 48V 100Ah battery pack is typically composed of 15 or 16 LiFePO<sub>4</sub> cells (each with a nominal voltage of 3.2V) connected in series. The cell capacity, such as 100Ah, can be achieved through direct parallel connection or modular design.
