## Overview

---

Does solar energy have potential in Sudan?

According to the study, solar energy has a huge potential in Sudan for contributing to the energy sector and development of the country. However, this potential is being challenged by the country's lack of incentives and current policies.

Will Sudan scale up solar power projects?

Sudan is also contemplating scaling up projects on solar power in the coming years. Most of Sudan's electricity generation comes from hydropower, and more than half of the Eastern African region's total oil-based capacity is located in the country. Sudan is also contemplating scaling up projects on solar power in the coming years.

Does South Sudan have a country Factsheet?

Specifically for South Sudan, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

Where can I find information about solar power?

For other data formats, resolution or time aggregation, visit Solargis website. The Global Solar Atlas provides a summary of solar power potential and solar resources globally.
