## Overview

---

Spain's energy-storage battery landscape is rich and varied: Basquevolt pushes solid-state R&D, Zeleros/Battera builds modular system design, Grenergy scales utility-grade projects, Iberdrola and Torresol anchor large-scale storage, while manufacturers like Cegasa and Bornay deliver proven chemistries. Why are battery storage options more suitable in Spain?

As a result, shorter duration storage options like batteries are more suitable in Spain. In Spain, over 50% of excess renewable energy occurs in periods where there is continuous excess for less than 12 hours i.e. a battery that chooses to charge on this energy would be able to discharge within 12 hours.

Which wind farm has the first battery storage system in Spain?

The Elgea-Urkilla wind farm, located in Araba (Basque Country), has the first battery storage system in a wind farm in Spain. This type of storage system collects the energy produced by the wind and has an installed power of 5MW and 5 MWh of storage capacity. It is the first green hydrogen plant in Europe.
