

SolarGrid Energy Solutions

Sri Lanka solar power tiles

**High Voltage
Solar Battery**

Overview

Why should you choose solar power in Sri Lanka?

Sri Lanka is one of the most expensive energy markets in the world. The use of solar can significantly reduce or eliminate your electricity bill as well as ensure an uninterrupted power supply. The average payback on solar power in Sri Lanka is 5 years. After this payback period, you are earning money on your roof.

What is Solar Resource Atlas of Sri Lanka?

The Solar Resource Atlas of Sri Lanka is an important addition to the existing knowledge on solar resources of Sri Lanka. The first solar atlas of Sri Lanka was prepared by the National Renewable Energy Laboratory (NREL) of USA, in 2005, as the Wind and Solar Resource Atlas of Sri Lanka and Maldives.

Who created the first solar atlas of Sri Lanka?

The first solar atlas of Sri Lanka was prepared by the National Renewable Energy Laboratory (NREL) of USA, in 2005, as the Wind and Solar Resource Atlas of Sri Lanka and Maldives. Such attempts in exploring solar resources of the country provided valuable information leading to gross estimates of solar potential.

How much solar radiation does Sri Lanka receive?

Sri Lanka receives significant amount of solar radiation across all geographical regions. The Global Horizontal Irradiance (GHI) varies between 1,247 kWh/m² to 2,106 kWh/m². It is interesting to note that the intensity of solar irradiation in lowland areas is high compared to mountainous regions.

Why is accurate solar resource resolution important in Sri Lanka?

However, the temporal and spatial data lacked accuracy and resolution necessary to make informed decisions on potential solar power applications. Therefore, the availability of accurate solar resource resolution was

considered crucial for the sustainable development of solar resources in Sri Lanka.
