

## SolarGrid Energy Solutions

# Sri Lanka will build energy storage power station

LIQUID/AIR COOLING

ON GRID/HYBRID

PROTECTION IP54/IP55

BATTERY /6000 CYCLES

## Overview

---

Issuing a statement, the CEB said this groundbreaking 600 MW project will store excess renewable energy from solar and wind sources, ensuring grid stability and supporting Sri Lanka's goal of generating 70% of electricity from renewables by 2030. What manages the power system in Sri Lanka?

The power system in Sri Lanka is managed by the System Control Centre—a function of the CEB transmission licensee. In 2016, energy loss in the transmission network was at 1.7%.

Will Sri Lanka build a coal-fired power plant?

In June 2016, the Sri Lankan government withdrew a plan to build a coal-fired power plant which was under way in collaboration between National Thermal Power Corporation (NTPC), India and CEB. They proposed the possibility of an LNG thermal power plant instead.

Does Sri Lanka have a good energy supply capacity?

The supply capacity in Sri Lanka is small (7-46). Furthermore, the amount of renewable energy developed is very small, which decreases the value of the ability to cope with load fluctuations in terms of energy security.

Does Sri Lanka have a power purchase agreement with USG?

Image: Terra-Gen / CPA. The government of Sri Lanka has entered into a power purchase agreement (PPA) with Australian firm United Solar Group (USG) for a major floating solar power (FPV) and storage project. The country's Minister of Power and Energy Kanchana Wijesekera announced the PPA on X, formerly known as Twitter, yesterday (12 December).
