

SolarGrid Energy Solutions

Standard distribution cabinet container base station

Overview

What is a container substation?

An intelligent solution for obtaining direct current quickly and economically is provided by container substations. By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality.

What is container type unitized compact substation?

Container type unitized compact substation Container type unitized CSS compact substation is a complete type tested per latest IEC standard 62271-202 which is comprising a outdoor enclosure containing medium voltage (MV) switchgear, power or distribution transformers, low voltage (LV) switchboards.

What is a small distribution substation?

Smaller distribution substations are subdivided into container-sized modules, which can be manufactured, assembled and tested at the factory, allowing easy transport and fast installation and commissioning at site.

Why is Hitachi energy developing a pre-fabricated Indoor Substation?

Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated indoor substations.

What is a custom built containerised solution?

Discuss your requirements with our experts today. Custom built containerised solutions, available for purchase or long-term hire, are designed and built to your specification using any combination of new or refurbished transformers, switchgear and ancillary equipment to meet your exact requirements.

How does a pre-fabricated building benefit a substation?

The pre-fabricated building shelters the equipment from environmental influences, thus increasing substation availability and reliability. Fences can be omitted, which simplifies permitting, while enhancing the substation's aesthetic appearance.
