Who makes lithium batteries in Sweden?

In Sweden, SAFT produces primary and secondary lithium batteries for the defense, rail, and telecommunications sectors. They develop large-scale of various energy storage system for the renewable energy industry as well. In present time, SAFT continues to be a major supplier of batteries for critical sectors such as military and infrastructure.

Are lithium-ion batteries the future of energy storage?

While lithium-ion batteries have dominated the energy storage landscape, there is a growing interest in exploring alternative battery technologies that offer improved performance, safety, and sustainability .

Why should you invest in batteries in Sweden?

Batteries enable the phasing out of fossil fuels and increase flexibility in the electricity system through energy storage. The Swedish battery industry is at the forefront. Sweden also has related strengths and opportunities in areas such as vehicles and electrical systems, as well as a strong mining cluster.

How many large-scale battery storage facilities are there in Sweden?

This initiative represents the deployment of 14 large-scale battery storage facilities with a total capacity of 211MW/211MWh - a historic investment and milestone in Sweden's transition towards a fossil-free energy system here and now.

Are lithium-ion batteries a viable energy storage solution for EVs?

The integration of lithium-ion batteries in EVs represents a transformative milestone in the automotive industry, shaping the trajectory towards sustainable transportation. Lithium-ion batteries stand out as the preferred energy storage solution for EVs, owing to their exceptional energy density, rechargeability, and overall efficiency .

Are batteries the key to achieving Sweden's climate goals?

Batteries are a crucial piece of the puzzle if we are to achieve Sweden's climate goals with net-zero emissions by 2045. Batteries enable the phasing out of fossil fuels and increase flexibility in the electricity system through energy storage. The Swedish battery industry is at the forefront.
