

## SolarGrid Energy Solutions

# Sun Chaser Solar System for RV

## Overview

---

What can an RV Solar System power?

An RV solar system can power various appliances and devices, including lights, computers, TVs, and refrigerators. Many people install these systems because they allow them to live off the grid without relying on hookups for electricity.

How does a sun chaser GPs work?

My Sun Chaser GPS reference station uses a 10-W solar panel connected to a 12-V battery to provide enough power. To increase the energy harvesting, the solar panel is mounted on a rotating disc that can be controlled by a DC motor to point in the desired direction. A stepper motor controls the solar panel's "tilting."

Should you go solar for your RV?

An RV solar system can provide you with all the energy you need to run appliances, lights, and other electronics while on the road. Whether you're a full-time RVer or enjoy taking your RV out for weekend getaways, going solar is a great way to reduce your environmental impact and save money on your energy costs.

What is a campervan Solar System?

A campervan solar system is a setup consisting of solar panels, batteries, a charger controller, and a campervan power inverter. This is what we purchased from Renogy for our Ford Transit build: 50amp DC-to-DC MPPT charge controller.

How does the Sun chaser work?

Photo 1: The Sun Chaser's stepper motor controls the solar panel's "tilting." "The Sun Chaser perfectly follows the sun's path and keeps the battery fully charged when there's enough sunlight," Brandsma says in his article about

the project, which appears in Circuit Cellar 's June issue.
