## Overview

What is EBRD doing with Tashkent solar PV & energy storage?

Nandita Parshad, Managing Director, Sustainable Infrastructure Group at EBRD, said: "We are proud to partner with ACWA Power and co-financiers on the pioneering Tashkent Solar PV and energy storage project in Uzbekistan, the largest of its kind in Central Asia. The project is core to Uzbekistan's ambition to install 25GW of renewables by 2030."

Why is ACWA partnering with Tashkent Riverside?

The agreement today for the Tashkent Riverside project reflects the strong trust placed in ACWA Power as the private sector partner, and one of the global leaders in renewables and energy storage.

Will Uzbekistan generate 40% of its electricity from renewables?

By 2030, Uzbekistan is aiming to generate 40% of its electricity from renewables. The BESS will help to mitigate the effects of intermittency that are inherent in renewable energy sources, storing excess electricity generated during times of high production and make it available during periods of low production.

What is the Uzbek greenfield project?

The greenfield development will involve the development of a 200MW solar photovoltaic (PV) plant and a 500MWh BESS that will serve to stabilise the Uzbek grid.

Why is Uzbekistan a case study?

"In a world that is looking for greater participation of private capital in emerging markets to support growth and decarbonization, Uzbekistan is a case study under the vision and leadership of its Government and lenders like EBRD, DEG, Islamic Development Bank, Proparco, KfW-IPEX Bank and Standard Chartered.
