What happened to Iran's Internet connection after a blackout?

Iran's internet connectivity has been partially restored after a widespread 62-hour blackout that began early Wednesday, though access remains "below ordinary levels" in most areas, according to internet monitoring group NetBlocks.

What happened to Iran's Internet?

In messages sent to Iran International, Iranians from across the country described severe connectivity outages affecting both mobile networks and home internet services which left them in the dark about the historic attack on the country.

Is the Internet down in Iran?

Multiple Iranians confirmed that the internet is entirely down in their areas, preventing the sending of videos or voice messages. "Even basic messaging barely works," One user from Tehran said. "I managed to connect to the global internet by accident using Psiphon on Windows. Please inform others that this method might still work."

Does Iran still have Internet connectivity after a 62-hour government shutdown?

"Metrics show a partial restoration in internet connectivity in #Iran after a ~62-hour government-imposed shutdown; however, service remains diminished in some areas and overall connectivity remains below ordinary levels," the group said.

Are Iran's 'beams on'?

"The beams are on," he wrote on Saturday morning. In a statement, the Iranian Communications Ministry on Friday said that due to the situation "temporary restrictions have been imposed on the country's internet," in

effect blocking Iranians from accessing outside news sources during the conflict between Tehran and Jerusalem. The beams are on.

Is Iran a digital blackout?

Men view the cityscape in the aftermath of Israeli strikes, in Tehran, Iran, June 13, 2025. A growing number of Iranians are reporting near-total internet outages across the country as the government appears to have imposed a widespread digital blackout amid the ongoing war.
