Thailand battery energy storage module price

Overview

What is the capacity of a battery module?

A battery module has a capacity of 5kWh and a discharge capacity of 2,5kWh. The systems with a capacity of 10kWh and 15kWh each have a discharge capacity of 5kWh. The LUNA2000 battery module is compatible with single and three phase Huawei inverters. In one solar panel installation two batteries can be installed parallel.

How many batteries can be installed in one solar panel installation?

In one solar panel installation two batteries can be installed parallel. This makes a maximum storage capacity of 30kWh per inverter possible. LUNA2000 batteries are safe and reliable thanks to the lithium iron phosphate (LFP) battery cells. Faulty battery modules are automatically isolated to keep the system running.

What are energy storage solutions?

Energy storage solutions can help stabilize your grid power with peak shaving and backup your renewable energy systems.
