Thailand installs photovoltaic energy storage project

Overview

Why is energy storage important in Thailand?

Sungrow noted that the Thai government has accepted that energy storage is vital to making renewable energy sources reliable and dispatchable. This led Sungrow and Super Energy, already partnered on a number of renewable energy projects in Southeast Asia, to proceed with the new plant's development.

Is Thailand leading the trend of solar-plus-storage applications in Southeast Asia?

"Currently, Thailand is leading the trend of solar-plus-storage applications in Southeast Asia and seeks more opportunities with technological innovations.

How many solar PV plants are there?

The projects comprise eight ground-mounted solar photovoltaic (PV) plants and four solar PV plants with integrated battery energy storage systems (BESS). The solar PV plants have a capacity of 393MW, and the solar plus BESS plants have a capacity of 256MW and 396MWh of energy storage.

Will China supply a complete solar inverter solution?

The China-headquartered inverter manufacturer said a few days ago that it will supply a comprehensive solution — including 49.01MW of PV inverters and a 45MW / 136.24MWh BESS — for partner Super Energy, a Thai renewable energy and independent power producer (IPP) company.

Why should you choose a liquid cooled power system in Thailand?

The liquid-cooled technology enables costs savings on logistics and installation as well as prolonging the life of the system and the company also claimed the high protection level of the battery cabinet and power conversion system (PCS) enclosure make the equipment suitable for Thailand's often hot and wet climate conditions.

Is Southeast Asia a good place for energy storage?

At an industry event hosted by our publisher Solar Media earlier this year, Alexander Lenz, regional Asia-Pacific CEO for Aquila Capital, said that Southeast Asia has excellent potential for energy storage.
