# The first batch of 5g base stations in Asia

## Overview

---

How many 5G base stations does China have?

By the end of April, China had accumulated nearly 3.75 million 5G base stations, or about 26 base stations per 10,000 people. The country's essential 5G standard patent claims had accounted for over 42 percent of the world's total.

What is the highest altitude 5G base station in the world?

In April 2020, China Mobile established a 5G base station at an altitude of 6,500 meters on Mount Qomolangma, which is the highest-altitude 5G base station in the world. -- In June 2020, China completed the construction of its first underground 5G network in Shanxi Province, setting a record as the deepest underground 5G network in the world.

What are some facts and figures about China's 5G development?

Here are some notable facts and figures about the country's 5G development. -- In April 2020, China Mobile established a 5G base station at an altitude of 6,500 meters on Mount Qomolangma, which is the highest-altitude 5G base station in the world.

Does China have 5G?

Today, with over 3.7 million 5G base stations installed nationwide, the large-scale application of 5G in China has greatly benefited both individuals and businesses, bringing significant convenience and opportunities. Here are some notable facts and figures about the country's 5G development.

Which countries are leading the 5G rollout?

Advanced Asia Pacific markets have taken the lead in the 5G rollout. Countries such as South Korea, Australia, and China, were among the first in the world to launch commercial 5G networks as more markets joined the ranks. 5G performance outranks Europe.

Which countries have successfully implemented 5G technology?

The Asia Pacific region has successfully implemented 5G technology despite the challenges posed by the pandemic, global economy, and geopolitical climate. South Korea, China, and Japan have led the way in 5G network deployment.
