

## SolarGrid Energy Solutions

# The largest photovoltaic energy storage project in Southeast Asia

## Overview

---

In December last year, Sembcorp Energy Storage System, Southeast Asia's largest storage project, which has a capacity of 285MWh and spans two hectares of land in the Banyan and Sakra region on Jurong Island, began operation. Will Terra become the largest integrated photovoltaic power station in Southeast Asia?

This project marks a significant milestone as Terra is poised to become the largest integrated photovoltaic and energy storage power station in Southeast Asia.

What is the role of solar photovoltaics in Southeast Asia?

Solar photovoltaics (PV) play a pivotal role renewable energy revolution of Southeast Asia. Abundant sunlight, economic growth, and the rising demand for clean energy drive this shift. Vietnam and the Philippines dominate the solar and wind capacity projections of South-east Asia, contributing 80 percent of the anticipated utility-scale projects.

What is China Energy Construction - Terra photovoltaic storage project?

Recently, China Energy Construction Co., Ltd. has made another major breakthrough in the international new energy market, and successfully signed the largest EPC (design, procurement, construction) project of integrated photovoltaic and storage power station in Southeast Asia with Manila Electric Power Company - Terra photovoltaic storage project.

What is the largest floating solar power plant in Southeast Asia?

Capacity: 192 MWp The Cirata Floating Solar Power Plant, Southeast Asia's largest floating solar installation, is located on a 250-hectare area of the Cirata Reservoir in West Java, Indonesia. This 145 MW (192 MWp) facility is Masdar's first floating PV project and marks its entry into the Southeast Asian renewable energy market.

How much solar power does Southeast Asia have?

Presently, ASEAN boasts 28 GW of large utility-scale solar and wind power, contributing 9 percent to the region's total electricity capacity. Solar photovoltaics (PV) play a pivotal role renewable energy revolution of Southeast Asia. Abundant sunlight, economic growth, and the rising demand for clean energy drive this shift.

What is China energy construction in Southeast Asia?

As another masterpiece of China Energy Construction in Southeast Asia, the Terra PV storage project will make full use of the abundant local solar energy resources to provide a stable power supply of no less than 84 hours a week and 600 MW through the joint operation of photovoltaic power plants and energy storage systems.
