# **The relationship between RV and portable power supply**

## Overview

---

There are a few differentiating factors between portable inverter generators and portable power stations. As with any purpose bought equipment, it gets down to intended use and frequency of use. The same holds true for portable inverter generators versus portable power stations. For this.

As with all RV equipment related items, we remind you to consider your specific RV's power requirements prior to purchasing a portable inverter generator. There are many variables.

Similar to portable inverter generators, there are several variables regarding your specific RV's or camping equipment's (i.e. pop up camper, tear drop camper or trailer, tent camping, etc.) power consumption requirements and intended use of our portable.

### Do all RV owners need a portable power station?

Even if your RV is equipped with a bank of house batteries, solar panels, and a generator, having a supplemental power source can be invaluable. Here are 9 reasons that ALL RV owners need a portable power station. 1. So you can stop tripping breakers and blowing fuses Inevitably, someone will bring a hair dryer on a camping trip.

### Can you use a power station while RVing?

Still, thanks to larger battery packs and more efficient solar panels, portable power stations have become viable options for use while RVing. Whether it's a primary source of power or a backup for your main generator, a power station can be a handy item to have at your disposal.

### Do I need a power source for my RV?

Whether you are towing a small pop-up camper or driving a 40-foot diesel pusher, you can never have too many options for readily available AC and DC power. Even if your RV is equipped with a bank of house batteries, solar panels, and a generator, having a supplemental power source can be invaluable.

Do you need a power station for a camper?

Whether it's a primary source of power or a backup for your main generator, a power station can be a handy item to have at your disposal. They can be useful for charging smaller devices without having to start a gas generator, for instance, and because they operate silently, they don't disturb other campers.

Are portable power stations a good alternative to gas?

Those alternatives come in the form of portable power stations, which use large lithium batteries to store power for use on the go. These devices are small and lightweight compared to gas-powered models and have the benefit of being free from both noise and emissions.

How do you charge a power station in an RV?

Fortunately, there are multiple ways to recharge most power stations. In addition to plugging them into an AC wall outlet at home, most models can also charge using the 12-volt DC port found in your RV. The majority of these devices can also be powered up using a solar panel, which is handy when used in the field.
