Two in one portable soldering iron power supply

Overview

How to use smart electric soldering iron?

Depending on different usage scenarios, it can be connected to power bank/power adapter/laptop and other power supply drive to work, with portable and efficient ways of use. Smart electric soldering Iron can use DC and PD two kinds of power input mode. PD/QC power supply up to 65W (9V-20V), DC power supply up to 96W (12V-24V).

What is ht140 portable soldering iron kit?

□Dual Power Input□ HT140 portable soldering iron kit features Type-C & DC5525 power jack, supports PD3.1/3.0/2.0, QC3.0/2.0, DC (28V Max). The voltage range is extended to 5V-28V, with maximum power up to 140W. Accepting more power supplies like 3S-6S lipo battery, PD charger, power adapter, power bank etc.

Can Smart electric soldering iron use DC and PD?

Smart electric soldering Iron can use DC and PD two kinds of power input mode. PD/QC power supply up to 65W (9V-20V), DC power supply up to 96W (12V-24V). Tips: Compatible charging protocols, PD2.0, QC3.0, DC.

What is the best soldering iron?

Miniware TS101: A smart soldering iron with a larger OLED screen, dual power input options, and precise temperature control for versatile soldering tasks.
Miniware TS1C: A cordless soldering station that combines portability with high performance, ideal for on-the-go repairs.

What is a portable soldering iron?

Storage All-in-One & Ergonomic Design: Portable soldering iron adopts aluminum alloy shell, and carries a protective cover for the soldering iron tip, which is a high-grade and hard material to protect the soldering iron effectively and increase the service life of the soldering iron.

Can a soldering iron be used as a tweezer?

It can be used as a soldering iron when installing a soldering tip. When set to heat on both sides, it becomes hot tweezers, making it easier to desoldering SMD components. Support setting the working voltage and current according to the actual power plug, meeting the usage of various power heads with different power.
