UHPC photovoltaic energy storage cabinet

Overview

What is UHPC – ultra high performance concrete?

making domes possible. Today, UHPC, Ultra-High Performance Concrete, redefines the concept of energy storage cabinets.

Are UHPC cabinets corrosion resistant?

Ultra-High Performance Concert, UHPC. Low-carbon infrastructure materials. UHPC cabinets are corrosion-resistant, leak-proof, salt-resistant, and highly weather-resistant, suitable for various construction environments. ● The general lifespan of anti-corrosion paint for metal cabinets is about 3-5 years.

Why are UHPC cabinets better than traditional cabinets?

Metal bodies are prone to moisture penetration through their seams. The thermal conductivity of UHPC cabinets is lower compared to traditional metal cabinets. The cabinet material has a long lifecycle, reducing carbon emissions by 50% compared to traditional metal cabinets. ● The lifespan of metal cabinet materials is around 10 years.

What is a single-unit modular energy storage container?

Compared to traditional 20/40-foot metal energy storage containers, our single-unit modular design offers greater space flexibility, enhances space utilization efficiency, and reduces asset risks during disasters. Our containers come in different specifications, making them suitable for various indoor and outdoor energy storage needs.

How are anomalies detected in the energy storage cabinet?

Temperature sensors and smoke detectors are installed for comprehensive monitoring within the energy storage cabinet. Anomalies are detected using our in-house developed EMS system, which continuously monitors environmental temperature, humidity, and battery module details.
