UPS battery cabinet placed against the wall

Overview

How to connect UPS & battery cabinets?

Ensure correct polarity. Connect the UPS and battery cabinets as per the drawing with specified cable. Connect the earth cable (PE) before connecting the other cables. Check the polarity of each shelf, making sure that the voltage is correct. Connect the shelves to one another. Check polarity of each cabinet at the fuse holder.

Can you put a ups in a wall-mount cabinet?

Background : We're looking at a few network wall-mount cabinets to hold some patch panels and POE switches. Ideally, I'd like to put a UPS in the cabinet, but due to it not being deep enough, it has a 5U vertical mount rack for installation of switches.

Where can a ups be positioned?

There are no restrictions to where you can position the UPS. The rear of the machine can be positioned against a wall. On machines with connecting cables at the rear, allow room for the curvature of the power cables. Do not crush the cables against the wall.

How to connect ups to a power supply?

Connect the mains supply PEN cable to the UPS Neutral connector (N). Ensure that the mains and load conductors are connected to the UPS as a clockwise (right hand) 3 phase system. Battery cabinets shall be installed alongside the UPS as per the drawing (note The Battery terminals are located on the right hand side of the UPS).

Can an ups be mounted vertically?

What it really comes down to is if the UPS in question is designed to be mounted vertically due to thermal issues. The batteries in a UPS are the sealed kind most of the time so that is not really an issue. Some types of UPS

can be mounted either in a vertical or horizontal position and are designed properly vent in either kind of install.

How to ensure a good ups installation?

Check for the safe access to carry out the UPS installation works. Coordinate with the other trades for any clashes. Check the is UPS room is airconditioned. Ensure equipment and its components are all in accordance with the approved material submittals. Make sure that adequate number of tradesman and proper tools are available at site.
