Overview

The Federal Energy Management Program (FEMP) provides acquisition guidance for uninterruptible power supplies (UPS), a product category covered by ENERGY STAR efficiency requirements. Does EPA consider uninterruptible power supplies a manufacturer partner of the year?

In order to recognize such efforts, EPA will consider such activity, along with others in this category, for purposes of Manufacturer Partner of the Year. Following is the Version 1.1 ENERGY STAR Product Specification for Uninterruptible Power Supplies (UPSs). A product shall meet all of the identified criteria if it is to earn the ENERGY STAR.

How efficient is an UPS system?

The efficiency of UPS systems varies with loading; typically the more highly loaded they are, the more efficient. Lightly loaded systems could be losing 15% or more of the energy supplied to the equipment downstream. The loss is from the power conversion within the UPS, which creates heat that must then be managed.

What is the Energy Star product specification for uninterruptible power supplies?

Following is the Version 1.1 ENERGY STAR Product Specification for Uninterruptible Power Supplies (UPSs). A product shall meet all of the identified criteria if it is to earn the ENERGY STAR. Static UPS: UPS where solid-state power electronic components provide the output voltage.

How does a ups work?

All power is derived from the energy storage system or, in the case of a DRUPS, from the integrated Diesel engine or a combination of both. The load is within the specified rating of the UPS. Bypass Mode: Mode of operation that the UPS attains when operating the load supplied via the Bypass only.

What types of UPS products are excluded?

UPS products that are internal to computers or other electronic devices; designed for industrial applications; part of an electric transmission or distribution system; used in mobile (e.g., marine, airborne) applications; or part of a cable television network are excluded. This acquisition guidance was updated in December 2022. Did you know?

.

How many Energy Star qualified ups shipments should a partner submit?

Partner must submit the total number of ENERGY STAR qualified UPSs shipped in the calendar year or an equivalent measurement as agreed to in advance by EPA and Partner. Partner shall exclude shipments to organizations that rebrand and resell the shipments (unaffiliated private labelers).

UPS uninterruptible power supply is a government procurement

Provision of Uninterruptible Power Supply Units and Power ...

May 9, 2013 · The United Nations (UN) is seeking Expressions of Interest (EOI) for the supply, delivery and after sales support of Uninterruptible Power Supply (UPS) and power accessories ...
