# Uninterruptible Power Supply Direct Sales

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible power supply (UPS) devices provide emergency power to an electrical load when the input power source fails. Each UPS (Uninterruptible Power Supply) is engineered to meet different power backup needs, from small office equipment to large data centers. Uninterruptible power supplies are sourced from trusted manufacturers.

Which is the best uninterruptible power supply manufacturer?

With 20 years of R&D experience in UPS industry, SCU, one of the biggest uninterruptible power supply manufacturers, provides 6KVA to 900KVA UPS products that are highest levels of availability, reliability and efficiency. SCU UPS products cover applications from IT rooms to large data centers and industrial plant and so on.

Where are uninterruptible power supplies sourced?

Uninterruptible power supplies are sourced from trusted manufacturers. They're part of our collection of power supply products & protection devices, which protect a load from dangerous changes in power supply.

Should you buy an uninterruptible power supply?

When load shedding occurs, the question of whether to buy an uninterruptible power supply (UPS) becomes a popular topic among consumers and small businesses. However, if you've attempted to purchase a UPS, you may have encountered technical terms and hardware features that are confusing.

How does an industrial uninterruptible power supply work?

While industrial uninterruptible power supply can work like a back-up power source, which converts utility power from AC to DC and provides DC current to battery for storage. When utility power fails, power stored in the battery will be discharged to supply the equipment.

What is an interactive uninterruptible power supply?

Rackmount-style 800 VA or 1100 VA line interactive uninterruptible power supply which protects against power failures and incorporates an automatic voltage stabiliser that balances sags and power surges.
