

SolarGrid Energy Solutions

Usp home inverter

Overview

How does a boost inverter work?

The Inverter has DC ports for Boost and solar, with 3 battery inputs and 4 MPPT inputs for solar. The DC-coupling of solar and batteries allows for higher system efficiency when charging batteries from solar. When the Inverter is installed with Boost and a Schneider Backup Controller, the system automatically powers the home during a grid outage.

How does a Schneider inverter work?

The DC-coupling of solar and batteries allows for higher system efficiency when charging batteries from solar. When the Inverter is installed with Boost and a Schneider Backup Controller, the system automatically powers the home during a grid outage. Homeowners can monitor, control, and automate their entire home energy with the Schneider Home app.

Can a Schneider inverter be configured with a solar system?

With the Schneider Inverter, systems can be configured with solar and batteries, solar-only, or batteries-only.

What is a home UPS (uninterruptible power supply)?

Our Home UPS (Uninterruptible Power Supply) is a reliable device designed to provide continuous power to household appliances during electricity interruptions. It seamlessly switches to battery power, ensuring a stable and uninterrupted power supply for essential devices such as computers, routers, and home electronics.
